3.7 km traverse from the top of TSD Bergerie - 25m D+ and 370m D-

Set off on an adventure among the larches with this itinerary that crosses the resort between 2100 and 1700 meters altitude.

Markings: blue or purple flags and black "pedestrian/snowshoe" signs on a yellow background.

Description:

Board the Bergerie chairlift at station 1600, just above the tourist information office.

1. Once at the top of the chairlift, exit to the left and enter the larch forest about 200 m to the east. A signpost indicates the start of the route. Follow the signs (stakes with blue flags and signs attached to trees) for about 1 km.
2. Leave the forest and carefully cross the red slope "La Draille" to reach the undergrowth on the other side. Ascend to

Useful information

Practice : Snowshoe

Height : 2117 m

Duration : 1 h

Quoting : R2

Geographical location

-  The ptarmigan and the mountain hare (A)
-  The wheatear (B)
-  Tournoux (C)
-  Le Laus (D)
-  The clouded Apollo (E)
-  Reading the landscape (F)

All useful information

Advice

Please consult the itinerary status:

<https://www.nordicalpesdusud.com/domaines/puy-saint-vincent>

A few rules:

→ You use these itineraries at your own risk. Find out about the weather conditions and avalanche risks published by Météo France. Also, don't hesitate to ask at tourist information offices or the Nordic chalet before you set off.

→ Night-time activities on Nordic areas are prohibited. It must be supervised by a professional and must be authorized by the slopes service.

→ Respect the furnishings: signage, prohibitions, trail directions, picnic tables, footbridges, banners, milestones, road signs.

→ Several itineraries are shared with other users: cross-country skiers, touring skiers, mountain bikers, sled dogs, rando-luge, trail runners. Give them the right of way, always walk along the edge of the trail and be vigilant when using these shared trails.

→ Many routes cross downhill ski slopes; be vigilant and give priority to skiers.

→ Don't walk in the cross-country ski rails, step over them.

→ Don't hesitate to take along a topo-guide so that you have all the information on snowshoeing itineraries to hand.

→ Don't overestimate your possibilities!

→ Dogs are tolerated, on a leash, off the cross-country ski trails (dogs are forbidden on the Lauzet itinerary of the Puy-Saint-Vincent ski area, reserved for approved sled dog teams). Don't forget to pick up after your dog.

→ Take your garbage with you!

→ Don't hesitate to take public transport rather than the car to get to the Nordic area.

Please note: This information is given for guidance only. It is your responsibility to check the weather report before you leave and not to overestimate your possibilities. The Tourist Office and the PNE cannot be held responsible in the event of an accident. In case of doubt, contact professionals: instructors or equipment hire companies.

Gear

Make sure you have the necessary equipment:

Water and snacks

Warm clothing (avoid jeans)

High boots (hiking, rigid snow boots)

Walking poles

Sun screen

Sunglasses

Hat/cap

Small first-aid kit

On your path...

The ptarmigan and the mountain hare (A)

The rock ptarmigan, a member of the grouse family, and the mountain hare are both perfectly adapted to high-altitude life. Among other adaptations, they turn white in winter in order to escape the attention of predators, and they are grey-brown in summer. In addition, their feet are covered with feathers or fur, and act as snowshoes when moving over snow. They are particularly threatened by the increasingly early arrival of the flocks in the alpine pastures, the boom in winter tourism and climate change.

The wheatear (B)

This bird is common in the alpine pastures and can be recognised by its grey back, its pale underside, its white rump, its white tail the shape of an inverted black "T" and by a black stripe over its eye. During the mating season, the male's underside is pinkish. Perched on a large rock, he utters a loud «uit uit» alarm call, which gives his presence away. A migratory bird, he arrives from Africa in April and flies south again in September.

Tournoux (C)

The Tournoux plateau is a small paradise with its cool meadows, its occasional renovated chalets made from stone and larch wood and its view over the Tête d'Aval, an imposing limestone peak forming part of the Montbrison massif. Whether on a mountain bike, on foot or on cross-country skis in the winter, this spot is always an invitation to stop for a break!

Le Laus (D)

A number of old alpine pasture chalets or hamlets, often renovated, are dotted across the Puy-Saint-Vincent resort. These are the Chalets du Laus. Le Laus is a place name designating a lake. In fact, just after the chalets, although not a lake, there is a flat, marshy area which is no doubt a small filled-in lake. So no point in bringing your pedalo!

The clouded Apollo (E)

White, almost translucent in places, with just a few black spots, this butterfly is a cousin of the better-known mountain Apollo. It lives in clearings in open woods where the plant on which the female lays her eggs grows, and on which its caterpillars feed: the corydalis. It is a mountain butterfly.

Reading the landscape (F)

The Vallouise valley is a tributary valley on the right-hand bank of the Durance. It is made up of three municipalities: Vallouise-Pelvoux, Les Vigneaux and, looking down from the heights, Puy-Saint-Vincent. This 25 km-long valley is dominated by numerous peaks, ranging in altitude from 980 metres, at the confluence of the Durance, to the peak of the Barre des Écrins at 4,102 metres (the highest point in the Les Écrins massif) and covers 18,541 hectares. Lying at the centre of the crystalline massif, the Vallouise valley is the gateway to the Parc National des Écrins and boasts exceptional and varied landscapes and a diverse wealth of fauna and flora.
